

# Sky Dive North Shore

**Feel the Thrill**

**Enjoy the Views**

**Tandem skydiving is without question, the safest way to experience skydiving for the first time.**

## **Skydiving**

Skydiving is now the extreme sport of choice. Tandem skydiving is when two people, use one larger parachute. The one that will be attached to you is a licensed tandem instructor so you can enjoy the thrill with just a few minutes of instruction. Our staff are all USPA licensed Tandem Instructors.

Tandem skydiving is restricted to those eighteen years and older, and not weighing more than 240 pounds. For those weighing over 200 pounds but less than 240 pounds, an additional \$2.00 per pound is charged, and your Tandem

Instructor must approve each sky diver weighing over 200 pounds. All tandem jumpers must sign our liability release / liability waiver form. Dress comfortably for the day and wear tennis or sport shoes. Most people at Skydive Hawaii jump in t-shirt and shorts.

Shuttles leave Waikiki hotels at 7:00a.m., 10:00a.m. and 1:00p.m. daily. The shuttle will return you approximately 6 hours after the time of departure. For those who are making tandem jumps, the shuttle is included at no additional charge. If you have your own vehicle, plan on spending about a two hours at our Dillingham Airfield facilities; three hours on weekends or busy days. We recommend that you arrive in the morning.

**The most professional staff, American parachute equipment, best facilities, best skydiving aircraft in all of Hawaii.**

**NO OTHER SKYDIVE OPERATION IN HAWAII PROVIDES THIS GUARANTEE.**

## Why Skydive?

People have many different reasons for skydiving: wanting to experience the rush and excitement, participating in a totally different sport, wanting to feel the "hard air" during free fall, just always wanted to do it or stress reduction therapy. While each person's reason for skydiving may differ, the general feeling on landing is euphoric. As Hawaii's oldest and largest sky diving center it is known for having the most experienced instructors and best equipment.

## The Skydive Experience

The tandem passenger will enjoy the great views of the North Shore during the fifteen minutes flight up to jump altitude. When the plane reaches jump altitude, your USPA Tandem Instructor will secure you to their gear. Together you will exit the aircraft and reach speeds of 120mph, without worrying about getting a ticket for speeding! Your freefall will be thrilling; remember to keep your eyes open!

The sensation of freefalling is not so much one of falling, but more like flying. When you exit the plane, the North Shore of Oahu is below you. On a clear day it is possible to see the other Hawaiian Islands in freefall.

After the canopy opens you will still be able to see much of Oahu.

Many times Diamond Head, Pearl Harbor, Kaena Point and the leeward coast are in plain view. You will also be able to see majestic bluffs, valleys, beautiful beaches, whales and other marine life from your canopy. Your friends can watch you smile, hoot and holler from our viewing area as you come in for landing back at the Airfield.
